

IMMUNIZATION REQUIREMENTS FOR GRADES K-5

All K-5 grade students (students born after July 1, 1996) are required to have had the following immunizations:

- 5 DTP or DtaP (4 doses are acceptable if the 4th dose was given after the 4th birthday).
- 4 doses of Polio
- 2 doses of MMR
- 3 doses of Hepatitis B vaccine (*new as of July 1, 1999*)
- Adequately immunized, according to age, against Haemophilus influenza type b (HIB)
- 2 doses of Hepatitis A vaccine-these are 6 months apart so schedule them early.
- Varicella (chickenpox) vaccine or proof of illness

All students must have a current record on file at school **before** the first day of school. Please drop off or mail a copy of the new pink immunization record to school as soon as possible. Utah State law requires RHSM to comply with this regulation. Your child will not be allowed into school without this record on file. If you have any questions, contact your physician or call S. Stevens RN, School Nurse, at 924-2946.

The Utah Department of Health website has further information.
